---

Dear Hiring Manager

I am applying for the Full Stack Web Developer position, bringing over three years of professional experience in fullstack web development, e-commerce customisation, and modern JavaScript frameworks. My expertise includes Laravel, Vue.js, React, Tailwind CSS, PHP, WooCommerce, WordPress, MySQL, and AWS—all key technologies commonly required in this field.

I have a deep passion for technology and problem-solving, having coded since the age of 10 and worked professionally since 2021. I am also proudly on the high-functioning end of the autistic spectrum. This means I approach challenges with intense focus, exceptional pattern recognition, and an ability to think logically through complex problems—qualities that have consistently translated into measurable business outcomes.

**Proven business impact:**

- At CheqUp Health Ltd., I led backend development in Laravel & Blade for a customer-facing dashboard, introducing automated testing and code review processes that reduced post-deployment bugs by 30%.
- At SquashLevels LTD, I managed the migration of a legacy SSR PHP system to Laravel 10 + Vue 3, improving system performance by over 40% and enabling the business to onboard new features faster.
- At Trison UK, I worked with high-profile clients including The FA and William Hill, delivering complex projects ahead of schedule while mentoring a team of five developers, which improved internal delivery efficiency and client satisfaction scores.

Beyond the technical side, I am skilled in optimising site performance, implementing SEO best practices, and developing custom modules and extensions that meet unique business needs. My work has directly improved page load speeds, reduced server costs, and increased e-commerce conversion rates.

I am particularly motivated by opportunities to build performant, scalable, and user-focused web solutions. I also value face-to-face collaboration and believe it leads to more cohesive, higher-quality project delivery.

I would welcome the chance to bring my technical expertise, business-focused mindset, and unique neurodiverse strengths to your team. I am confident I can make an immediate and measurable impact on your development projects and contribute to the long-term success of your web platforms.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience align with your needs.

Kindest Regards,

**James Timms**

## Profile

I am a passionate software engineer who primarily works in fullstack web development using Laravel, Vue, React, and Tailwind CSS. I've also gained broad exposure through freelance work in CakePHP, Node.js, Python, .NET, and TypeScript. I've been coding since age 10 and professionally since 2021. I'm on the high-functioning end of the autistic spectrum—which I proudly view as a superpower!

## Skills

### Main Stack

- Laravel / PHP Backend
- Vue / React / Javascript Frontend
- Tailwind / Bootstrap

### Additional Tech

- CakePHP, Symfony
- MySQL, MongoDB, PostgreSQL
- Python, .NET
- Node, Typescript
- AWS: EC2, S3, Lambda, Aurora RDS
- Wordpress: Custom Theme, WooCommerce, Custom Plugins
- CSS, SCSS, SASS, LESS

## About Me

- Passionate about technology
- High-Functioning Autism
- Enjoy Competitive Gaming
- Enjoy Karaoke & Singing (Badly!)
- Love Spending Time with My 6 Year Old Daughter

## Experience

### CheqUp Health Ltd. – Backend Engineer

Apr 2025 – Present

- Laravel & Blade development working on customer facing dashboard
- Leading specific projects
